

Schedule 40 PVC Fittings

- Won't corrode like metal
- Lower material and installation costs than metal fittings

Our comprehensive line of Schedule 40 PVC fittings offers injection molded configurations in various sizes, both slip and threaded. Unlike metal, PVC fittings never rust, scale or pit, and will provide many years of maintenance-free service and extended system life. PVC thermoplastic handles fluids at service temperatures up to 140°F (60°C), allowing a wide range of process applications, including corrosive fluids.

Fittings offer substantially lower material costs than steel alloys or lined steel, combined with lighter weight and easy installation—reduce installation costs by as much as 60% over conventional metal systems. Conform to ASTM D2466.

CLIC® TOP Premium Pipe & Cable Hangers

- Self-locking clamps for easy one-handed installation
- Pipe hangers are chemical- and UV-resistant

CLIC® TOP one-piece self-locking plastic pipe hangers are designed for easy single-handed installation. Simply mount the hanger, insert the pipe or tubing into the clamp, and apply slight pressure until the clamp clicks snugly into place.

Choose from pipe hangers or cable & tubing hangers. **Pipe hangers** feature pure polyamide construction for excellent chemical and UV resistance. Use them to hang plastic pipe indoors and out. **Cable & tubing hangers** offer copolymer construction and are for indoor use only. Ideal for hanging tubing or cable.
