**USABlueBook Log Books**

- Specially designed for water and wastewater treatment plants
- Hard-bound books meet legal requirements

You should always maintain log books in the operations center and lab of water and wastewater treatment plants. Taking complete notes every day on numbered pages shows that data hasn’t been altered, making these hard-bound books legally admissible in court. Choose from three styles.

_Treatment plant_ and _lift station log books_ feature lined pages with space for a date. Typical entries should include names of people on duty, weather conditions, equipment malfunction, operating problems, important phone messages, security information, and actions taken in response to unusual circumstances.

The _laboratory log book_ features gridded pages with space for the date and project name. Use it to keep track of important test results, calibration information, chemicals, procedures or unusual occurrences.

All books have 192 pages. If you use one page a day, each book will hold six months of data. Each cover has a space to fill out your plant’s location as well as the beginning and end dates of the log. Sold in packs of two books.

---

**Nalgene® Laboratory Notebooks**

Professional hardcover notebooks contain 8½” x 11” gridded paper for recording results of test procedures. Pages are permanently bound in polyethylene-wrapped cover. Choose from books with 96 or 184 pages.

**“Rite in the Rain” Notebooks & All-Weather Writing Instruments**

- Perfect for humid, damp environments
- Use in the lab or the field

_Rite in the Rain_ notebooks are ideal for taking notes or recording data in the most humid environments. Pages feature an exclusive chemical coating that sheds away water. All notebooks feature horizontal lines and will work with any pen or pencil. Choose from four different sizes and page counts.

_All-weather writing instruments_ work in a wide range of conditions. The durable clicker pen features a pressurized cartridge that lets you write upside down and in the most extreme temperatures (rated from -30 to 250°F). The mechanical pencil features a patented expanding tip that ensures the 1-mm lead won’t break, wobble, twist or fall out.
