Barracuda Cut-Resistant Gloves

- ANSI Cut Level A2
- Machine washable

Barracuda gloves combine cut protection with comfort. Their high-performance polyethylene (HPPE) fiber shell is 10x stronger than steel and 40% stronger than blended fabrics. A polyurethane coating provides an excellent grip, while the seamless design enhances comfort. Machine washable. Sold by the pair.

MaxiFlex Ultimate

MaxiFlex Cut

MaxiFlex® Ultimate™ & Cut™ Gloves

- Excellent dexterity and sensitivity
- 360° breathability keeps hands cool and dry
- Standard and cut-resistant styles available

MaxiFlex gloves feature an exceptionally thin lightweight design. Their breathable microfoam nitrile-dipped palm offers superior grip and abrasion resistance. Natural "hand at rest" fit reduces hand fatigue for all-day comfort.

Choose from two styles. **MaxiFlex Ultimate** gloves have a seamless knit nylon with lycra shell. **MaxiFlex Cut** gloves feature the same breathable seamless design with added cut protection. CutTech high-performance yarn and fibers meet both ANSI Cut Level A2 and Federal Regulations for Food Contact. Reinforced thumbs and index finger also improve cut resistance. Both styles are machine washable. Sold by the pair.

ProFlex® 7031 Nitrile-Coated Cut-Resistant Gloves

- ANSI Cut Level A3
- ANSI Abrasion Resistance Level A4
- Sandy nitrile dip provides excellent grip

These gloves offer light/medium cut protection, reinforced durability and a superior grip in wet or dry conditions. Their 13-gauge A3 cut-protection liner provides cut, puncture and abrasion resistance in tough environments. Reinforced nitrile thumb dip adds extra protection in high-wear areas. Seamless knit wrists prevents dirt and debris from entering the glove. Machine washable. Sold by the pair.
