

7021 WSX Gloves

7022 DSX Gloves

## ProFlex® Hi-Vis Nitrile-Coated Cut-Resistant Gloves

- ANSI Cut Level A2
- Superior grip
- Choose from gloves for wet or dry conditions

Constructed from 18-gauge yarn, these high-visibility gloves offer cut, puncture and abrasion resistance in the harshest work environments. Touchscreen-capable fingertips let you stay connected and protected. Seamless knit wrist prevents dirt and debris from entering the glove. ANSI Level 4 abrasion resistance for long wear. Machine washable. Sold by the pair.

**ProFlex 7021 WSX™ gloves** are excellent in oily and wet conditions. Flexible and comfortable, they offer dexterity and relieve hand fatigue. WSX multi-layered grip technology lets air flow through for breathability. The bottom protective water-based PU layer wicks sweat away. An anti-slip nitrile exterior absorbs and disperses liquids from the surface for a better grip.

**ProFlex 7022 DSX™ gloves** provide unmatched grip in dry conditions. DSX nitrile-coated grip technology is abrasion-resistant and outperforms all other nitrile-based dips in dry environments. This multi-layer coating allows air to flow through, keeping hands comfortable and dry. The top layer features a highly abrasion-resistant coating for durability and longer life.

## Barracuda Cut-Resistant Gloves with Impact Protection

- ANSI Cut Level A2
- TPR protects back of hand and fingers from impact

West Chester's popular cut-resistant Barracuda gloves are now available with thermoplastic rubber (TPR) on the back of the hands and fingers for impact protection. Like standard Barracuda gloves, they offer a high-performance polyethylene (HPPE) fiber shell dipped in polyurethane (PU) for an excellent grip. Machine washable. Sold by the pair.

## Hi-Vis Foam Nitrile Palm-Coated Cut-Resistant Gloves

- ANSI Cut Level A3
- High-visibility yellow shell with orange palms

These gloves are constructed of high-performance polyethylene (HPPE) fibers which are 10x stronger than steel and 40% stronger than blended fabrics. This innovative material not only protects, but is comfortable and flexible for any job. Nitrile-coated palms make these gloves perfect for wet, greasy and oily conditions. Machine washable. Sold by the pair.

## R2 Hi-Vis Cut-Resistant Gloves with Impact Protection

- ANSI Cut Level A3
- TPR protects back of hand and fingers from impact

Protect your hands against both cuts and impact damage. Gloves are constructed of high-performance polyethylene (HPPE) fiber, a material 40% stronger than blended fabrics, and are nitrile dipped for excellent cut protection. 7 mm-thick TPR (thermoplastic rubber) shields the back of the hand and fingers from impact. Gloves also feature a reinforced Kevlar thumb saddle. Shell is hi-vis yellow; palm is orange. Machine washable. Sold by the pair.
