

**USA BlueBook** BRAND PRODUCTS

**YOUR BEST VALUE!**

**Collect your liquid sample directly into a Nalgene bottle**

**USA BlueBook EXCLUSIVE**

Fits 32-oz (1000-mL) Nalgene wide-mouth bottles

**USA BlueBook Grab Samplers for 1000-mL Nalgene® Bottles**

- Protect your sample from cross-contamination

Convenient and easy to use, these samplers feature an ABS plastic flow-through head you attach to a wide-mouth 32-oz (1000-mL) Nalgene bottle (sold separately). No need to touch a messy bottle after wastewater collection—simply unthread the sampler by the handle (use a desired length of 1" PVC pipe). There are no complicated spring-loaded mechanisms or bottle holders that require extra handling. For distance line sampling, just clip a cord to the sampler head.

**DWK Life Sciences (Wheaton) Subsurface Grab Sampler I**

- Features 6' handle
- Suited for EPA Standard Methods grab sampling procedures

DWK Life Sciences (Wheaton) grab samplers prevent sample contamination during water quality testing and comply with EPA sampling procedures. With a 6' handle, they make subsurface water sample collection simple. Units allow easy access from boats, decks or spillways without ever touching the water.

Samplers are constructed of 3/4" square aluminum tubing with a baked enamel finish. They feature two stainless steel clamps and include one 1000-mL sample bottle.

Sampler bottles are autoclavable and feature borosilicate glass construction with Teflon®-lined caps. Approximate volumes listed directly on the bottle.

**Shipping:** Additional handling fees apply to samplers.
