

## Whirl-Pak® Water Sampling Bags & Racks

- Sterilized water and wastewater sampling bags
- Thio-Bag® is EPA approved for potable water sampling

All Whirl-Pak sampling bags are sterilized and can be used to collect samples of potable water, effluent, streams or industrial waste. All bags comply with sampling requirements specified in *Standard Methods for the Examination of Water and Wastewater*, Method 9060 A. Choose from standard or stand-up bags, which feature a special gusseted bottom that allows the bag to stand up on its own.

### Thio-Bags

Thio-Bags contain enough sodium thiosulfate to neutralize chlorine at the time of collection. Purple closure tape makes these bags easy to identify. Bags have a convenient write-on strip to aid in sample identification. Available in standard and stand-up bags.

Stand-Up Bag 30926

Thio Stand-Up Bag 23231
