

Aluminum Pipe Wrenches

- Heavy-duty

Heat-treated aluminum alloy handle. Our aluminum pipe wrenches exceed U.S. government specifications for ductile-iron wrenches but weigh only half as much.

RapidGrip® Pipe Wrenches

- Self-adjusting jaws with thumb release for one-hand operation and rapid ratcheting action
- Choice of aluminum or cast iron

RIDGID RapidGrip features one-hand operation for speed and ease of handling not found with conventional pipe wrenches. Being able to keep one hand free at all times makes RapidGrip a dream tool for installing threaded pipe and fittings, especially in confined areas.

Spring-loaded jaw design eliminates two-handed jaw adjustment and also provides continuous positive grip for rapid ratcheting action. Thumb release trigger facilitates easy application and removal from pipe or couplings. Includes RIDGID lifetime warranty against defects in material and workmanship.

CHANNELLOCK® NUTBUSTER® Tongue & Groove Pliers

- Pipe wrench alternative for pipes in close quarters
- PermaLock® fastener won't slip after adjusting size
- SAFE-T-STOP prevents pinched fingers

NUTBUSTER pliers are a great alternative to pipe wrenches, and work better in close quarters. The CHANNELLOCK BLUE® comfort grip makes them easier to adjust and lighter weight than a standard pipe wrench.

These pliers are great for gripping rounded surfaces. The parrot nose design gives the extra gripping power needed to bust loose stubborn nuts and bolts. The two sets of offsetting tongue and grooves also support the pliers' gripping power.
