

PlantPRO™ Bio-Blocks

- 30- to 90-day dosing
- Superior performance against fats, oils and grease

High-quality, high-count stable bacteria in these blocks degrade organic waste to reduce odors and grease build-up. The blocks gradually dissolve over 30 to 90 days (depending on flow), continuously adding bacteria.

Choose from standard blocks (4 billion bacteria per gram) or premium blocks (8 billion bacteria per gram plus oxygen infusion technology). Premium blocks offer faster, more effective reduction in odor and FOG (fats, oil and grease). The one-two punch of increased bacteria count and stable oxygen release allows greater aerobic respiration, accelerating biological activity for superior performance.

UPDATED models!

DESCRIPTION	STOCK #	EACH	QTY 3+	QTY 6+

Dosage Schedule

Flow Rate	Block Size	Maintenance
Up to 125,000 gpd	5 lbs	1 block every one to three months
125,001 to 775,000 gpd	10 lbs	1 to 2 blocks every one to three months
750,000 to 2 million gpd	30 lbs	1 to 2 blocks every one to three months

USA BlueBook BRAND PRODUCTS

Quickly dissolve grease, fats and oils!

USA BlueBook Floating Lift Station Degreasers

- Will not disrupt bacterial action
- Choose from orange, pine or grape degreasers

Don't be fooled by cheaper imitations. These highly-concentrated lift station degreasers will outperform competitive products, saving you time and money because you require less degreaser to do the same job. They quickly dissolve heavy grease accumulations in lift stations. Many competitive products use NPEs (nonylphenol ethoxylates), which have been shown to negatively impact the environment. Ours do not and are environmentally friendly.

The specially-designed floating formula extends the degreasing action as the level rises and falls. The floating action also acts as an odor barrier, keeping the odors under the surface. The pleasant fragrance is not a perfume, but a naturally-occurring scent with superior odor-absorbing power which drastically reduces noxious sewer odors.

Choose from three degreaser scents

All-Natural Orange Degreaser offers the tremendous cleaning ability of d-Limonene (natural orange peel extract) and a citrus/orange scent. **All-Natural Pine Degreaser** offers the tremendous cleaning ability of Dipentene (natural pine extract) and a pine scent. **Grape Degreaser** is a powerful biodegradable solvent blend degreaser with a grape scent.

Shipping: The 30- & 55-gallon drums and quantities of 7+ of the 5-gallon pails ship motor freight.

Dosage Schedule

Use 1/2 gallon to 1 gallon for each square foot of water surface. You may cut back after the initial dose, depending on the lift station influent and temperature.

YOUR BEST VALUE!

NPE free!

USA BlueBook High Heat Activated Alkaline Drain Opener

- Pays for itself many times over in reduced labor costs
- Great for regular preventive maintenance

Powerful caustic granules activated with aluminum needles clears pipes, drains and sewer lines without damaging them. Formula releases high heat and turbulence to liquefy, dissolve and loosen animal and vegetable fats and oils, hair, paper, organic matter, and other materials. Contains tracing dyes so you can check flow rates and possible obstructions. To clear municipal sewers, use about 25 lbs per manhole; industrial drains use 2 to 3 lbs.

Shipping: Hazmat fees apply. Ships by ground only. Quantities of 3+ ship motor freight.
