

7000 Series (40 gpm) 95015

O'Brien Trailer-Mounted Sewer Jetters

- Clean sewer lines up to 24"
- Hydraulically-driven hose reel pivots 190° for easy access
- Variable-speed control

Rely on these powerful trailer-mounted hydrojetters to flush out culverts and clean sewer lines and pipes. These rugged machines are designed for municipalities, industrial site users and contractors. They range in size from 350 to 700 gallons with flow ratings of 10 to 40 gpm, and pressure ratings of 2000 to 4000 psi.

Jetters have large polyethylene water tanks that are plate-mounted with sump and side baffles. Tanks feature a crowned top and side stabilizers for added strength. A Murphy safety gauge with auto-shutdown protects the pump from damage if the water level drops too low. The hydraulically-driven hose reel pivots 190°, making access a breeze regardless of how the trailer is positioned. The hose reel has variable speed control via a tethered, hand-operated controller.

Jetters are rated to carry a full tank of water at highway speeds. **7000 Series Jetters** are mounted on 6" channel A-frame tandem-axle trailers, DOT-rated at 7000 lbs per axle. **3500 Series Jetters** are mounted on 6" channel A-Frame single-axle trailers, DOT-rated at 7000 or 6000 lbs per axle (model dependent). The Bulldog Ball Hitch on the trailers is 2⁵/₁₆". Fenders are "catwalk" style so you can walk on them without causing damage.

Customized units are available as a special order with many optional features, such as arrowboards, rotating strobes, electric jacks, and anti-freeze systems for colder climates. Contact USABlueBook for more information.

Includes: 400 feet of abrasion-resistant thermoplastic sewer hose and two nozzles (penetrator and flusher), tool tray, 20 feet of contrasting color leader hose, and two auxiliary 12V power supply outlets.
