

COLLECTION SYSTEMS Lateral Jetting

General Jet-Set Sewer Jetter/Pressure Washers

- Portable high-pressure jetter quickly converts to equipment washer
- Vibra-Pulse® feature increases cleaning power of electric jets

These combination sewer jetter/pressure washers are compact, portable and powerful. Selectable Vibra-Pulse feature breaks the tension between the surface of the hose and pipe walls. This helps the hose slide around tight bends and propels it over long distances. Choose from 2- and 4-wheel models.

Use as a sewer jetter

Keep your pipelines clean and free-flowing. The water jets are ideal for clearing mud, sludge and sand from sewer lines. Their forward penetrating blast of high pressure water hits stoppages and flushes them away. At the same time, powerful thrusting of the rear-facing jet nozzles propels the hose down the line, scouring the pipe wall and clearing it of hardened scaling and deposits.

Use as a pressure washer

Use the spray wand and chemical injector for vehicle and equipment cleaning (included with Packages 3 and 4; available as special order for other packages). An optional foot pedal shut-off control (available as special order) frees both hands while maintaining control over water flow.

We offer four popular packages with a variety of features, depending on your needs. **Note:** Some options (such as an electric starter; battery not included) are available with only some of the packages. Other models and other accessories are available as special order. Contact USABlueBook for more information.

Shipping: Ships motor freight.
