Brass Nozzle	14150	\$

Brass Washdown Nozzles

One-piece brass construction. Full-force solid stream. 3/4" GHT.

DESCRIPTION	STOCK #	EACH
Nozzle Without Shutoff	14170	\$

Hose Shutoffs

- Open and close different hose as needed without having to disconnect them
- Swivel connections make installation a snap
- Choose from brass, all-metal or plastic shutoffs

Gilmour, a leader in garden hose and hose accessories, offers a full line of shutoffs for your specific needs. Many other manufacturers restrict flow through their shutoffs. Gilmour's brass units offer 35% higher flow, and the all-metal and plastic units offer 45% higher flow than the competition.

Choose from single, double or four-way shutoffs. Shutoffs allow several connections to one hose bibb, so you can open and close hoses as needed without having to disconnect them. Large handles make turning the flow on and off easy. Swivel connections make installation a snap. Buy several shutoffs and keep them on hand for whenever you might need them.
