

Truck-mounted Hydro-Hitch makes it easy for just one operator to flush your hydrants!

Truck-Mounted Hydro-Hitch with Pitot Assembly 63285

Optional Lock Box Strainer 63288

Truck-Mounted Hydro-Hitch with 4" Cam Lock Fittings 63287

Hydro-Hitch™ Water Diffusers

- Designed for fast, efficient, safe discharges
- Choose from truck-mounted or hydrant-mounted diffusers

The Hydro-Hitch water diffuser allows just one technician to easily flush all your hydrants. Install the diffuser horizontally and flush through either one end or both ends, or install it vertically and flush through the bottom. The diffuser is constructed from powder-coated aluminum and weighs only 21 pounds. Choose from truck-mounted or hydrant-mounted models.

To operate the truck-mounted Hydro-Hitch, simply connect it to the trailer hitch on your vehicle and run a hose between it and the hydrant. Choose from three truck-mounted Hydro-Hitches: with 5" Storz® fittings; with 5" Storz fittings, pitot assembly and 3 1/2" gauge; or with 4" cam lock fittings. All models include one 2 1/2" NST(F) swivel port.

Several accessories are available for the truck-mounted Hydro-Hitch. Choose an Aqua-D-Chlor™ tablet feed attachment to dechlorinate water. The inner chamber has three adjustment settings for various chemical rates of dissolution. For applications with ascorbic acid tablets, order the optional fine-screen stainless steel insert for the tablet feed attachment. A diffuser strainer and flushing elbows (30° or 90°) are available for the 5" Storz fitting models. A 4" cam lock box strainer is available for the cam lock model.

We also offer hydrant-mounted steamer port diffusers. The unique perforated design has a spray pattern that will not erode lawns and keeps you dry while the hydrant is opened. Choose from several connection sizes.

Customize your Truck-Mounted Hydro-Hitch with these accessories.
