

PIPE PVC Pipe Fittings & Accessories

Schedule 80 Fittings

- Choose from PVC and CPVC fittings
- Slip, threaded and stainless steel reinforced

Use Schedule 80 fittings to maximize the strength of your chemical feed lines and especially where you are using threaded connections, since threading PVC pipe greatly reduces working pressure. Schedule 80 fittings are compatible with Schedule 40 pipe. Socket indicates a female socket

connection into which a pipe or spigot fitting is inserted for solvent welding. Spigot indicates a male spigot connection, meaning that the male end can be inserted into a socket fitting. Threaded refers to NPT (M or F).
