Pack and Pop Collapsible Traffic Safety Cones

- Collapse flat for easy storage and transport
- Bright orange waterproof nylon with reflective bands—highly visible in all conditions
- Choose from individual cones or packs of 5

Pack and Pop collapsible cones are great for workers on the go. Take them anywhere—just fold them down and throw them in your trunk or pickup bed. These 28" orange cones are made from waterproof nylon and come mounted on a 13" plastic base. They feature 4" and 6" reflective bands and have an internal LED light with two settings (on or flashing) for maximum visibility. Lights use two AAA batteries (included) and endure 100,000 flashes or 36 hours of steady burn.

Cones are easy to transport in their convenient carrying cases. Choose from individual cones in a single-cone case, or a pack of five cones in a five-cone case. Meet MUTCD standards for traffic safety cones.

42" Orange Cones

The molded-in handle on these rugged orange stacker cones can be used for barricade tape. Sectioning off trenches or confined space areas has never been easier. The 16-lb rubber base makes them hard to tip over. Both plain and reflective style available.

Shipping: Additional shipping fees apply. Quantities of 11+ ship motor freight.

Hi-Vis Traffic Safety Cones

- Superior quality
- All-vinyl wide body design with rugged base stays upright

These injection-molded PVC cones bounce back to their original shape after being run over. The non-fading brilliant fluorescent color completely permeates inside and outside of the cone. Extra-rugged wide base design ensures cones won't tip over. Cones are available in 12", 18", 28" and 36" heights. The 36" height meets the latest traffic legislation.

Order cones with or without reflective white collars. Collared cones have 6" wide collars on the upper part of cone and 4" wide collars on the lower portion of cone. Cones with reflective white collars meet NCHRP-350 Certification and MUTCD standards.

Shipping: Additional shipping fees apply to 28" and 36" cones. Quantities of 40+ ship motor freight.

Creates a quick temporary visible barrier

Barrier Cone Bars

- Unique push-pin locking mechanism
- Lightweight and portable

Bars are a quick and easy solution for marking off temporary hazardous areas and work zones. To use, simply expand the bar to your desired length between 5' and 8', and place the bar's end rings over the top of two traffic cones (cones sold separately; see ad above). Plastic-molded ring ends measure 3 1/2" in diameter. Bars feature 4"-wide reflective tape for maximum visibility day or night.
