Classic Pliers

Quick-Adjust Pliers

Klein Tools® Klaw™ Pump Pliers

- Narrow design—ideal in tight spaces
- Choose from Classic or Quick-Adjust styles

Klaw pump pliers feature a uniquely designed jaw that provides multiple points of contact for maximum torque. Specially hardened teeth cover the inside of the jaw for excellent gripping power. 10" and 12" sizes also feature a groove near the jaw tip for holding nails. Choose from Classic style or Quick-Adjust style that offers a push-button quick-ratchet feature for faster, easier adjustment.

CHANNELLOCK® GRIPLOCK® Pliers

These pliers have a unique jaw and handle design for positive gripping and one-handed operation. Once pliers are engaged, only downward pressure on the handle is required for a positive grip, no squeezing! The V-shaped jaw locks around hex bolts to prevent rounding, and is also great for pipe. Tongue and groove adjustment mechanism locks jaws securely in each position. Forged from high-quality high-carbon steel and fully heat-treated for long life.

LENGTH	JAW CAPACITY	STOCK #	EACH
9 ¹ / ₂ "	1.32"	25246	\$
12"	2.38"	25247	

Protect your hands as well as you protect all the other tools in your tool box. See pages 1501-1515 for

Work Gloves.

Alligator Pliers

Cobra Pliers

Knipex® Adjustable Gripping Pliers

- V-shaped jaw eliminates burring and rounding of nuts
- Narrow profile perfect for working in tight spaces

Knipex adjustable gripping pliers will occupy a permanent place in your toolbox. Their self-gripping V-shaped jaws grip hex nuts on four sides instead of two, eliminating nut burring and rounding. Similar to a pipe wrench, the harder you push the handle, the tighter the jaw grips.

Knipex pliers feature a narrow profile perfect for working in tight spaces. Their chrome vanadium, oil-hardened electric steel construction provides exceptional durability, while the plastic-coated handles ensure a comfortable grip.

Choose from two styles of adjusting mechanisms. Alligator® pliers feature a conventional sliding cam and groove design. Cobra® pliers are adjustable with one hand by pressing a button and sliding jaws in or out.

CHANNELLOCK® Tongue & Groove Pliers

Undercut tongue and groove design assures strongest can't-slip jaw action. Right angle teeth grip in both directions, and patented PermaLock® fastener is far stronger, safer and smoother working than old-time bolt and nut. Your choice of the conventional straight jaw design or V-jaw, which is generally preferred for pipe and hex bolts because they lock better around round surfaces. All feature CHANNELLOCK BLUE® comfort grips.
