**USABlueBook** BRAND PRODUCTS

**USABlueBook Jumbo Pleated Filter Cartridges**

- Choose from standard filters or those that conform to NSF/ANSI 61
- 100% polypropylene pleated material allows higher flow rates
- 5-micron filters and larger are cleanable and reusable

These filter cartridges deliver maximum throughput and particle retention at the lowest pressure drop. The center tube, end cap and polypropylene filter media are thermally bonded as one unit for optimal strength and a positive seal.

5 micron-sized filter cartridges and larger can be cleaned and reused when pressure reaches 12 to 15 psid. Replace cartridges when pressures reach 25 to 30 psid. Maximum temperature: 160°F.

For use with: jumbo filter housings; see page 376.

**USABlueBook** BRAND PRODUCTS

**USABlueBook Pleated Filter Cartridges**

- 99.98% efficiency—ideal choice for sediment loading
- Materials meet FDA CFR Title 21 standards

These filter cartridges are carefully inspected by trained operators to ensure the highest quality filters. They handle temperatures up to 140°F.
