

Minneapolis Curb Boxes

- Fits all size Minneapolis pattern threads
- Curb boxes telescope one foot

These rugged, durable A.Y. McDonald curb boxes have dedicated Minneapolis pattern bases to ensure alignment with curb stops. Featuring cast-iron base castings and 1 1/4"-diameter steel upper sections, all models adjust 12" in overall length for ease and flexibility during installation.

Curb box bases are tapped 2" NPT(M) to fit 1 1/4", 1 1/2" and 2" Minneapolis style curb stops. An included reducing bushing adapter also allows installation on 3/4" and 1" Minneapolis curb stop sizes.

All models include a pentagon plug-style lid. Other overall lengths are available; contact us for details.

Curb Box Repair Lids

- Fit most curb boxes, old and new styles
- Locking feature with unique key prevents unauthorized access

Lost lid? Broken lug? Broken top? These curb box repair lids can solve your problem! Repair lids feature a brass screw which is assembled after painting, to facilitate operation. Installation is easy—just insert the jaws against the shaft and tighten the screw to expand the jaws against the inside walls of the curb box.

Choose from lids with a standard pentagon screw or tamper-resistant locking screw. Locking lids use a unique keyway to prevent vandalism; purchase key insert tool separately.
