Prevent curb box tampering!

USA BlueBook Water Service Curb Box Locks

- Stop unauthorized access to curb boxes

Prevent curb box tampering! When customers don't pay their water bills, service is typically turned off with a valve key. However, those with access to valve keys can reopen the valves at any time. Curb box locks stop such occurrences by locking out access to curb boxes. Just attach a padlock (sold separately) to the hinged lid to prevent tampering.

Curb box locks feature 14-gauge steel construction. Brass-body padlocks are recommended for maximum corrosion protection; see page 1095 for our selection of keyed-alike padlocks.

Handheld repair tool for fast valve box repairs

Hydroverge Kerf Cutter Valve Box Repair Tool Kits

- No need to cut asphalt or dig out a section of the road
- 3-year warranty

This handy repair tool kit provides a low-cost, labor-saving solution for repairing valve boxes. It lets you quickly and easily remove broken, sunken or damaged valve box tops, and replace them with new ones.

The system centers around a handheld repair tool featuring a 110V, 15A lightweight Bosch motor with a circular blade on the end of an extended drive. To make a repair, use the tool to cut off the damaged valve box top. Then, remove the top and replace it with a valve box insert replacement top (sold separately below). Included accessories ensure precision measuring, level cutting and fast removal.

Includes: handheld repair tool, cutoff wheels (three each of 4 1/2", 5" and 6"), grinding wheel for concrete and asphalt (6" Dia x 2"-thick, 16-grit), puller, basket and ring cutting guide, 2'L cut gauge, and wooden storage crate with sectioned foam cutouts for each item.

Valve Box Insert Repl. Top 65514

Accessories complete your system

Valve box insert replacement top installs level with the pavement for a clean repair. It measures 11" high with cast-iron construction. **Includes:** 5" cutting wheel, butyl gasket and adhesive.

Optional operating nut adapter is for use with long or extended valve nuts. It lets you cut further down the pipe and protect the nut while cutting the top section away. **Includes:** (15) 4 1/2" cutting wheels, adjustable top section, bottom section, (3) 14" extensions, (5) 6" extensions, (2) 4" extensions, tape measure, hex key and tool box.

Service Box Combo Keys

- Pentagon key, rod key, pick and chisel

Our combination wrench has an AWWA No. 1 (27/32" flat to point) pentagon socket that is slotted to enable the wrench to function as a rod key after the lid is removed. The 14" handle has a pick point on one end and a chisel point on the other for removing debris and for prying. Strong all-steel construction for years of service.
