

# HYDRANTS Wrenches

## A Adjustable Hydrant Wrenches

- Utility quality
- Best seller

Extra-long handle support for thread protection. Drilled for lug/rocker style caps. Adjustable handle screws in and out for a tight grip on the pentagon nut. Zinc-chromate plated. Overall length: 20". Weight: 5¼ lbs.

Adjustable Hydrant Wrench	22512	\$

## B Hydrant Ratchet Wrenches

- Our best flushing wrenches
- Unique 5-sided pentagon socket fits hydrant nuts perfectly

Saves time opening and closing valves. Single-handle wrenches requires only a 6" swing. Double-handle wrenches provide additional leverage for tight hydrants. Sockets have a 9/16" square hole for hydrant sockets. A thumbscrew locks the socket to the hydrant nut. These wrenches are faster and less likely to damage nuts than other adjustable wrenches. Order handles and sockets separately.

## C 5-Hole Hydrant Wrenches

- Heavy-duty construction

Wrench features a five pentagon hole design, making it compatible with most common-sized hydrant nuts. It includes a built-in spanner for both pin lug and rocker lug hose fittings. All cast-iron construction. Plated for added durability. Overall length: 14½". Weight: 2 lbs.

## D Storz® Universal Hydrant Wrenches

- Fits 4" and 5" Storz fittings

The head and threaded handle adjust to fit standard sizes of pentagon and square hydrant nuts. A spanner hook is part of the head casting, which loops out to grab lugs on 4" and 5" Storz fittings. Ductile-iron head with steel handle.

DESCRIPTION	STOCK #	EACH
Storz Hydrant Wrench	25271	\$

## Non-Adjustable Hydrant Operating Wrenches

- Solid 1-piece ductile iron casting

Non-adjustable wrenches fit specific operating nut styles and sizes, so they won't round corners like other wrenches can. The opposite end acts as a spanner wrench for attaching or removing both pin- and lug-type hose couplings. Constructed of solid one-piece ductile iron casting with an enamel finish. Overall length: 15". Choose from wrenches with square or pentagon opening.
